JULIEN ASSOULINE

FRONT END/FULL STACK DEVELOPER

julsassouline@gmail.com

Developer with experience building front end and full stack apps. Strong foundation in JavaScript with an expertise in data visualization.

SKILLS

Languages
- HTML, CSS, JavaScript, Python, SQL

Libraries & Frameworks
- React, D3, Node, Express, Django, GraphQL, Apollo, React Native, Material-UI, Webpack, PostgreSQL, Jest, react-testing-library, TypeScript

Others
- Git, npm, yarn, GitHub, Azure, Bitbucket, Netifly, Heroku

Talks and Teaching

React + Native Toronto
- D3 + React best practices

TorontoJS Meetup Lightning talk
- Talk on how to integrate D3 into your React project.

Python bootcamp instructor for TRSM
- Created bootcamp material to teach business students python and pandas.
- Taught multiple bootcamp sessions, and students.

EDUCATION

Red Academy
Full Stack Developer program | April 2019 - July 2019
- Built web and mobile applications. Learning both frontend and backend modern technologies.

Ryerson School of Journalism
Bachelor of Journalism | Sept. 2015 - Apr. 2019

Columbia Graduate School of Journalism
PostBac data journalism | May 2017 - August 2017

WORK EXPERIENCE

Web Developer in baseball operations
Toronto Blue Jays | Dec 2019 - Present
- Built the team's first SPA with React (hooks), and Node. Application for tracking and analyzing live baseball game data, with PDF report generation, so that scouts can show reports to players.
- Helped with Azure deployments.
- Built new and updated data visualization systems using JavaScript, D3, and Django. Worked with various front office members to add the features they wanted/needed.

Full Stack Developer
Senior Care Connect | APR 2019 - Jun 2019
- Full stack mobile app for client that connects seniors with caregivers.
- Built with React Native, Redux, Apollo, GraphQL, and PostgreSQL.
- Implemented designs from designers. Used git for workflow and reviews.

Interactive Developer Intern
CBC | Sept 2018 - Oct 2018
- Used JavaScript and Python to improve and build new features on web projects such as the Sunshine List application.
- Was viewed/used by more than 100,000 people. Worked with reporters to get data and build responsive web visualizations for stories.
- Performance optimization with REGL and Canvas.

JavaScript Developer Intern
Flourish | May 2018 - August 2018
- Used D3 and JavaScript to build and design flourish templates (Flourish is a data visualization software).
- Lead developer for the parliament and chord diagram templates.
- Fixed bugs, applied new modules, and added new features across all templates.
